File Integrity Checking and Monitoring Tools

- Aide
  (https://sourceforge.net/projects/aide/)
- Rootkit Hunter
  (https://sourceforge.net/projects/rkhunter/)
- Samhain
  (http://www.la-samhna.de/samhain/index.html)
- Tripwire
  (https://sourceforge.net/projects/tripwire/)
- OSSEC
  (https://github.com/ossec)

Types of files an organization might want to monitor for integrity include:

- Key system files such as configuration files and the Windows registry
- Any files containing sensitive information
- Important files that rarely change, such as static webpages
